ABOUT US

Favored Healthcare Services was founded by a healthcare industry veteran. As a founder, the Administrator has served as a licensed professional registered nurse for over 18 years in the State of Georgia. We strictly adhere to the rules and regulations of the State of Georgia Department of Community Health.

As health care continues to move away from institutions to homes, use of home care services is increasing and the various therapies being provided at home are more complex. With technological advances and portable equipment such as pumping devices, more cardiac clients can be cared for at home, rather than in the hospital.

FHS offers private home health care services to individuals who are not capable of functioning independently on their own but require watchful oversight and/or supervision.

FHS goals are mainly to provide quality skilled nursing care and personal support services to its clients. These services and care will be provided by licensed professional nurses (Registered Nurses and Licensed Practical Nurses) and trained/qualified Personal Care Aides/Certified Nursing Assistants and Companion/Sitters. All services and nursing care are periodically observed and supervised by Registered Nurses.

We are fully insured and bonded. We cover twenty (20) counties.
